business
schools

Learning Objectives

Provide practical and theoretical tools to understand the fundamental concepts of corporate finance - valuation, profitability, and risk.

Grasp the concepts and tools of fundamental concepts of investment and financing decisions related to financial management.

Train executives in corporate finance capable of carrying out their mission in a transversal dimension.

Develop managers' skills in order to be capable of carrying out their mission in a perspective of renewed value creation and valuing an ethical and legal environment.

The leader in entrepreneurship

- Acquire the basics of finance, of the financial management of a company, and in particular of financial balances,
- Master the use of bank financing but also market financing,
- Acquire methods of financial analysis and construction of steering tools,
- Read and interpret the different indicators on a dashboard.
